School Spider

## School Spider Parents' Area

Dear Parents,

As you know we have been using our School Spider communication platform for parents for some time. This will allow you to receive important information directly from the school quickly and easily.

You must have provided school with a valid email address and phone number to access the App.

You can log in via the School Spider app after having selected our school.

You will be able to do the following in your parents' area:

- **Complete online surveys and forms**
- **Receive messages from the school** (app only)

Don't forget to turn your notifications on!

Downloading the App

You can download the School Spider app via the iTunes store for iPhones or iPads or via the Google Play Store for Android devices.
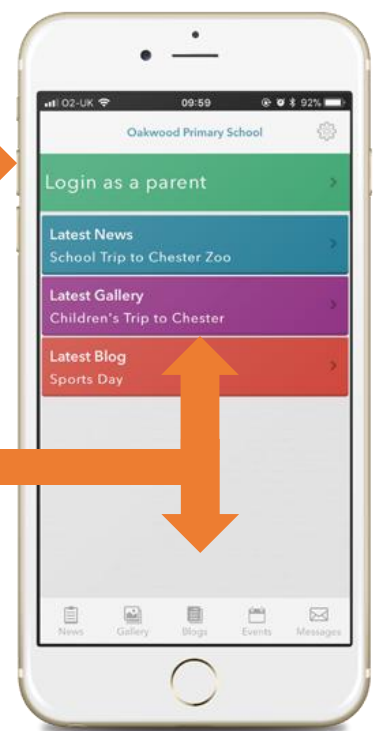

Search for School Spider and download the app for free.

Click on "Select your school" and scroll to find our schools name and then click Continue.
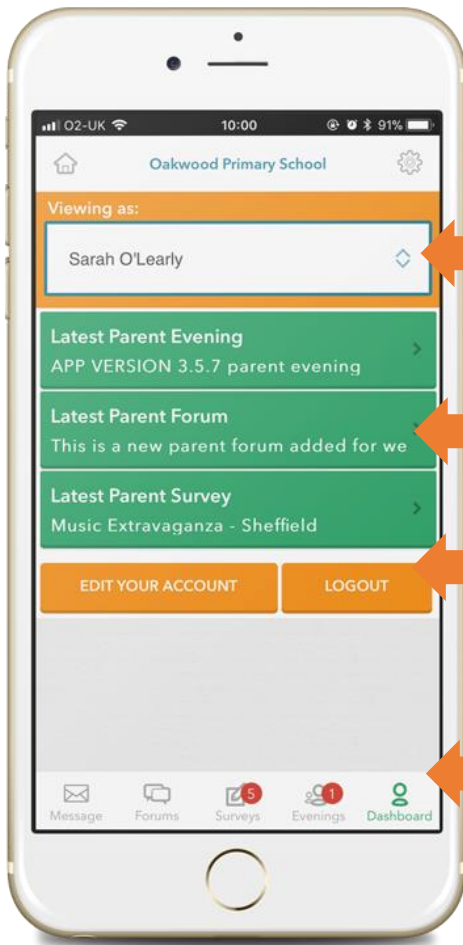

Once you have selected the school you will see website posts such as news, galleries, blogs and calendar items.

Select "Login as a parent" and use your username and password that has been emailed to you.

You can view the most recent post on the school website here. Use the tabs at the bottom to view all website news, galleries, events and blogs.

# School Spider

How It All Works

If you have more than one child in the school, click your child's name and it will show you a drop down of all other children associated to you.

View your most recent notifications and

Edit your password or logout of the app here

Click into the relevant icons to respond to the school. There will be a notification icon when something is outstanding.

Receiving Messages and Responding

Once you have downloaded the app and are logged in, you will receive push notifications to your phone which will tell you what needs to be done.

Click into the relevant icon, all new surveys /forms, parents evening and messages will show in dark green. Click into these to view and respond to the school.

You can see more about the app by watching the below YouTube video:
