

Subject Leader Portfolio

Maths

Thoughts about my subject: Mrs Deakin

Mathematics is my absolute favourite subject.

I love a challenge and finding different ways to solve problems.

Mathematics is FUN!

I also like how Maths can be seen and used in everyday life for example: money at the shops, patterns and shapes in many different places, and can be used in other subjects like in Science and Art.

When I look in your books and visit your lessons I would love to see:

- Beautifully presented work
- Lots of challenges and problem solving
- Mistakes that have then been green pen edited
- Lots of thinking, reasoning and explanations
- Dive deeper activities
- Evidence of fun Maths learning
- Evidence of practical resources being used.
- Peer support

Great work I have seen happening around school:

I always see wonderful things happening around schools.

I have loved seeing lots of practical resources being used to support the teaching and learning.

Lots of oral rehearsal of key facts.

Lots of Mathematical discussions and teamwork.

Learn to Love & Love to Learn in readiness for life
