

Mathematics Newsletter - Spring 2022

We are at the end of a very busy, but also fantastic term that has been jam-packed with lots of fun Mathematics learning and challenges!

In our Mathematics lessons, all children have lived out their score values with diligence, their commitment to their learning has been wonderful to see and their resilience remains strong.

I would like to take this opportunity to thank you for your continued support and wish you all a lovely Easter!

Many thanks, Mrs Deakin

Exciting news: Our lessons are have become even more fun and practical after a huge delivery of

brand new

Mathematics

resources for the

whole school,

which are now

being successfully implemented

into our classrooms and have even taken our

Maths learning outside onto the playground.

This term we also participated in **World Maths Day** where the children engaged in an afternoon of fun Mathematics games, competed in timed events in their P.E. lessons and had the opportunity to enter a 'Mathematics found in our world' competition. Here are some of the entries we had, including some of our fantastic winning photos. Well done all!
